Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/031,410	Applicant(s) ERIKSSON ET AL.	
	Examiner James S. Ketter	Art Unit 1636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1636

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6, 8-15, 17-22, 25-28, 31-33 and 35-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to all of the instant claims, claims 1 (from which claims 2-6, 8-15, 17-22, 25-28, 31-33 and 35-37 depend) and 38 recite “highly focused” in reference to the electric field. However, the term “highly focused” is a relative term without precise meaning in the art, and also without a precise definition in the specification of the instant application.

It is noted that at pages 7 and 8 of the remarks filed 1 February 2007, in response to the rejection under 35 USC §102(b), now withdrawn for other reasons, that Applicants have argued that the term in question is adequately defined in the specification. In particular, page 8, lines 30-37 of the specification are pointed out. However, this relies upon a functional definition, the avoidance of affecting any surrounding structures, which is itself unclear. An electric field dissipates as it extends beyond the electrode. At what strength at a point in the field is a surrounding structure affected? Furthermore, what structures are included in this statement? And in what manner are they affected? These are not clear from the specification and as such, the metes and bounds of the instant claims are not clear.

With further regard to claim 27, the phrase “a well-defined volume of a substance” relies upon a relative quantity, e.g., what separates a well-defined volume and a poorly-defined volume? As such, the metes and bounds of the claim are unclear.
